

Attendees will learn:

Provide insights into the process from discovery through development using the example of Neuronascent's disease-modifying therapy NNI-362 in Phase1a for Alzheimer's.

Provide insights into the differences and similarities between "neuron regeneration" and "neurogenesis", both in vitro and in vivo.

Provide insights into how a novel mechanism of action (i.e. allosteric stimulation of p70S6kinase) could provide disease-modifying benefit in developmental delay.

The UC Davis MIND Institute is a collaborative international research center, committed to the awareness, understanding, prevention and care of neurodevelopmental disorders.
